
Tyler F. Flowers

Programmer + Customer Service

business@ggtylerr.dev

SKILLS

- Experience with multiple languages, including Java, JS, C++, HTML and CSS.
- Ability to work under pressure.
- Able to work well and coordinate with groups.
- Able to supervise and lead multiple projects at once.

PROJECTS

These are just the most prevalent projects I made. All of these are open source on my GitHub. To see all of my projects, go to <https://ggtylerr.dev/projects>

DSA Bot / GG Bot - *Discord Bot*

FEBRUARY 2020 - PRESENT

- A Discord bot originally made for an esports team, but now is for general-purpose.
- GG Bot is a rewrite of DSA Bot, which is focused on esports and more functionality.
- One of the few bots to be hosted on repl.it that works.

mutat.io - *AIO Conversion Tool*

MARCH 2020 - PRESENT

- A no-nonsense conversion tool meant to eliminate the need for individual tools.
- Has unit, file, timezone, and even language 'conversion'.

ggtylerr.dev - *Website*

MARCH 2020 - PRESENT

- A clean looking website made in plain HTML+CSS, with little to no JS.
- Also hosted on a dedicated server and made with Node.JS and Express.

KAaNE - *External Game Tool*

JUNE 2018 - PRESENT

- A tool for the game "Keep Talking and Nobody Explodes" that allows for singleplayer gameplay.
- Multiple versions exist, including an android app and a (soon to be released) Qt 6 version.

EXPERIENCE

8-Bit Esports - *Programmer*

JUNE 2021 - PRESENT

- Currently working as the main developer in the branch.
- Working on multiple projects, such as GG Bot, Backstage (TBA), and their Discord servers
- Working under pressure and with a 30 person team.

MC Events - *Programmer*

DECEMBER 2021 - PRESENT

- Worked on server plugins for a "Minecraft" game server, and currently working with Discord bot development
- Also moderated and did PR for the 3k+ (and growing) Discord server.

LVL UP EXPO 2022 - *PC Volunteer*

FEBRUARY 25 2022 - FEBRUARY 27 2022

- Helped with maintaining the 90+ PC setups in the LVL UP EXPO convention, each of which worth \$6k.
- Also answered questions for attendees and did general Customer Service, with a 30ish person team (varying among days.)

EDUCATION

Valley HS, Las Vegas NV - *Freshman*

AUGUST 2017 - JUNE 2018

This is where I first learned programming, not only through their Web Design class, but also through a helpful teacher in a Robotics club that taught Python 2.7.

Del Sol Academy, Las Vegas NV - *Sophomore-Senior*

AUGUST 2019 - JUNE 2021

While there weren't any programming classes available, I went through Graphic Design 1-3 to learn the design aspects of a program. I've also self-taught myself during this time and found out about SSE through the school's esports club.
